4871.MOT.V1

MINING OUTLET TESTER

Patent Pending No: AU2017902878

Application:

The 4871.MOT is a complete mining outlet tester for the metalliferous mining industry and is equipped with many testing features.

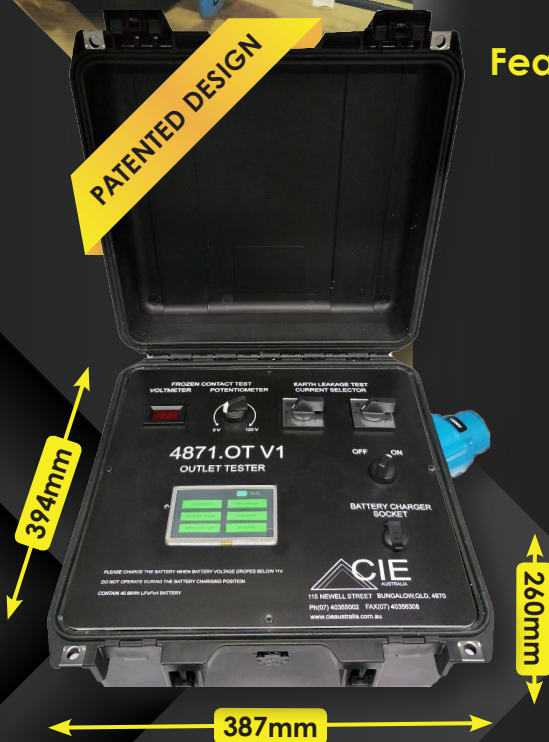

The MOT has a diverse range of applications for single and three phase power at various voltages.

This compact, lightweight, and robustly designed unit is the perfect solution to Mining Restrained Outlet Testing requirements.

Features:

- High speed and robust design
- User friendly
- Touch screen operation for all tests
- Live battery voltage information
- Phase information snapshot
- Phase-Phase voltage
- Phase-Earth voltage
- Phase rotation
- Earth continuity, short circuit and open circuit tests
- Frozen contactor tests
- Earth leakage lock out tests
- Earth leakage test with 1000V, 415/240 and 110V via variety of different current levels.
- Remote stop start (Diode & RTM)
- Enclosed in a sturdy carry case for enhanced portability and durability
- Light weight and long battery life for continuous operation (5 hour+)
